EDUCATION

Bachelor's in Engineering Physics
Missouri State University
Springfield, MO | 2010

Master's in Computer Science
University of Missouri - Kansas City
| in-progress

Programming Languages

Javascript, Node JS, Python, Golang, Bash

Databases

PostgreSQL, Elasticsearch, Redis, Mongo DB, Snowflake

Architecture

AWS Lambda, AWS Kinesis Data Streams, Nginx, Apache Kafka, Docker, Micro-Service Architecture

PROFILE

I work as a full-stack software developer with over 8 years of experience building and maintaining web applications. I have a passion for solving fun and challenging problems and enjoy learning new technology. My skill set includes extensive experience using Javascript, Python, Golang, React, Redux, NodeJS, GraphQL, MongoDB, Elasticsearch, PostgreSQL, Snowflake Warehouse and other technologies to build complex web applications.. I earned a Bachelor's degree in Physics and a minor in Mathematics and I am also currently seeking a Master's degree in Computer Science with an emphasis on Machine Learning and Data Science.

EXPERIENCE

Senior Data Engineer

EquipmentShare | Kansas City, MO | 2020 - PRESENT

As a Senior Data Engineer at EquipmentShare my primary responsibility was to build and support our main data warehouse which was Snowflake. I helped architect and build a real-time streaming pipeline using AWS Kinesis Data Streams and AWS Lambda functions to stream billions of records into Snowflake.

- Implemented a data streaming pipeline using technologies such as Amazon Kinesis Data Streams and AWS Lambda.
- Helped to build a data transformation layer using Python services.
- Was responsible for monitoring and maintaining the health and performance of the data warehouse and pipeline.
- Helped to increase SQL performance and efficiency.

Senior Software Engineer

Dunami, Inc. | Overland Park, Kansas | 2015 - 2020

Dunami is a real-time data analytics company that focuses on network relationship analysis with several patented mathematical algorithms for finding influencers. As a full-stack developer at Dunami, I worked as the team lead for the presentation team, which is responsible for building and maintaining all the user-facing applications as well as the APIs and middleware services that support the data needs of those applications. Specifically, we have built and maintained several single page applications written in React and Angular and a variety of Node.js services that provide the data contracts for these applications.

- As the presentation team lead, I managed other team members and developed /

Web Technologies

REST, GraphQL, HTML5, CSS3, React, Angular JS, Redux, D3

implemented the front-end architecture for several large single page applications.

- Worked as a frontend engineer to develop highly sophisticated web applications using AngularJS and React/Redux.
- I was responsible for building multiple interactive data visualizations using CSS, HTML5, and D3.
- I was responsible for developing a GraphQL API using Node JS.
- I worked with my other team members to develop a Node.js microservice architecture to serve the data contracts for our single page applications.
- I developed / published / maintained multiple NPM modules for collaborative use around our organization.

Software Developer

Keyhole Software | Leawood, Kansas | 2014 - 2015

During my time at Keyhole Software, I worked for several clients as a full stack web application developer. I participated in developer cutting edge applications using Node.js, Backbone JS, Angular JS, Mongo, Redis and Socket.io.

- Planned, architected and developed multiple web applications with diverse stack requirements and client expectations.
- Owned several JavaScript single-page web applications using different front-end frameworks.
- Developed and maintained highly-performant RESTful APIs with Node.js.
- Worked as a technical architect to oversee the implementation of reference architecture for multiple teams.

Software Developer

Ad Astra Information System | Overland Park, Kansas | 2012 - 2014

I began at Ad Astra as a summer intern and was converted to full-time at the end of the internship. While at Ad Astra I helped to maintain a legacy .NET application, as well as implementing and improving core analytical algorithms.

- Developed high quality code in a professional environment.
- Worked to enhance the design and functionality of a web based, Single-Page Application using JavaScript and Ext JS.
- Worked to improve stability and performance in sophisticated back-end systems.
- Contributed extensively to refactoring database systems and SQL stored procedures for performance increases.
- Collaborated with developers and product managers to provide creative and innovative solutions for clients.
- Lead a research project for the conversion of Ext JS 3.x to Ext JS 4.x.
